NORTHERN MICHIGAN UNIVERSITY
CS 326-01-04F
FALL 2004
OBJECT ORIENTED DESIGN

3 credits
3607 West Science
Monday Wednesday Friday 11:00 – 11:50 A.M.
Monday 30 August 2004 through Friday 10 December 2004
except Monday 6 September 2004, Friday 8 October 2004, Wednesday 24 November 2004 through Friday 26 November 2004
Final Exam: Wednesday 15 December 2004 10:00 – 11:50 A.M.
Instructor: Andy Poe, 1129 New Science Facility, 227-1598

The course covers the object oriented design paradigm of programming, and is required for the Computer Science and Network Computing majors. You will learn how to design objects for efficient use and reuse of code.

Text: *Object-Oriented Software Development Using Java*, Xiaoping Jia. I am not sure how much I will be using this textbook if at all, so I have it listed as an optional textbook I have had difficulty finding an appropriate text for this class. You can obtain this book from the bookstore, but there is no law that says you must obtain it from there. You might try Amazon.com or Bookpool.com to see if you can get a better rate.

Courseload: There will be no exams. The assignments will be a series of (sometimes quite challenging) Java programs that exemplify the power of object-oriented design. There might also be some written assignments, but not necessarily.

Office Hours: Monday Wednesday Friday 3:00 –. 5:00. Other hours may be made by appointment, or, if I'm in and my door is open, feel free just to stop by!

Disability: If you have a need for disability-related accommodations or services, please inform the Coordinator of Disability Services in the Disability Services Office at 1104 University Center (227-1737). Reasonable and effective accommodations and services will be provided to students if requests are made in a timely manner, with appropriate documentation, in accordance with federal, state, and University guidelines.
