CS101 Website Construction

Prerequisites: None

Text: *A Balanced Introductinn to Computer Science* David Reed

Supplies:

A computer is necessary. A laptop computer is best. Free software is available.

This course satisfies the Formal Communication Studies requirement:

Courses that satisfy this requirement are designed to introduce students to the ways in which information and ideas are expressed using a communication system other than English. Such courses should foster the student's ability to conceptualize and communicate in an orderly, rational manner. Characteristics of a communication system include: 1) possession of a grammar; 2) operation from an established set of rules; 3) reasoning properties such as deduction, inference drawing and problem solving. This includes courses in languages and those in which the central focus of the course is on statistics, computers, or formal logic.

General Information:

This course is an introduction to web site comstruction and maintenance. It is also a very limited introduction to computer programming.

If you want a course in how to use a computer (particularly in a business setting) take CIS 110 instead. CIS 110 is an introduction to using the most common types of computer programs.

If you want a course in computer programming, you should probably be taking CS120. There is no experience required for CS120, it is all programming, and is the standard first course in the computer science major.

Grading will be done about half on tests (of which there will be three or four) and half on laboratory assignments. Class members are encouraged to communicate with each other when preparing laboratory assignments. Each student's assginments must be unique, however.

Physical Disabilities:

I will help you as I can, be sure to ask!

The Coordinator of Disability Services is in the Office of Student Support and Disability Services, room 2001 in the C. B. Hedgcock building. The phone number is 227-1700 TTY: 227-1543. Reasonable and effective accommodations and services will be provided to students if requests are made in a timely manner, with appropriate documentation, in accordance with federal, state, and University guidelines.
