NORTHERN MICHIGAN UNIVERSITY
CS 201-01-03W
WINTER 2003
PROGRAMMING IN C++

3 credits
Monday Wednesday Friday 3:00–3:50 P.M.
Monday 13 January 2003 through Friday 25 April 2003, except Monday 3 March 2003 through 7 March 2003
Final Exam: Thursday 1 May 2003 2:00–3:50 P.M.
1705 West Science
Instructor: Andy Poe, 1129 New Science Facility, 227-1598

This course is required for all Computer Science and Network Computing majors. It is an introduction to C++ for Java programmers. Since the students in this course should already be able to program at the 120/122 level, we should be able to get to some pretty interesting stuff in C++.

Optional Text: *The C++ Programming Language*, Special Edition, Bjarne Stroustrup
This book is available at the Bottum University Center Bookstore. You can also get it from bookpool.com at a reduced price. This text is a complete description of the C++ language. We will certainly not be able to cover the entire C++ language—it is huge; however, this would be an excellent reference book for this course, and, indeed, for whenever you need program something in C++!

Courseload: There will be frequent programming assignments and possibly written homework assignments. These will comprise 60% of your final grade. There will be two in-class exams each comprising 10%, and a final exam comprising 20%.

Office Hours: I will be available from 4:00–5:00 P.M. every day except Tuesday. You are always free to make appointments for other hours, or to stop by if I happen to be in.

Disability: If you have a need for disability-related accommodations or services, please inform the Coordinator of Disability Services in the Disability Services Office at 1104 University Center (227-1737). Reasonable and effective accommodations and services will be provided to students if requests are made in a timely manner, with appropriate documentation, in accordance with federal, state, and University guidelines.
